

# CalAmp Compliance

## Avoid Regulatory Headaches and Streamline Reporting

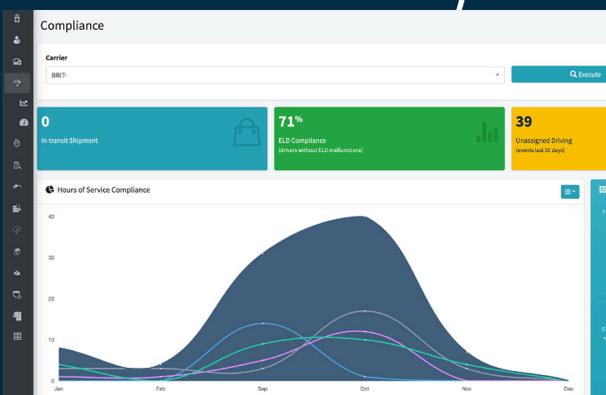

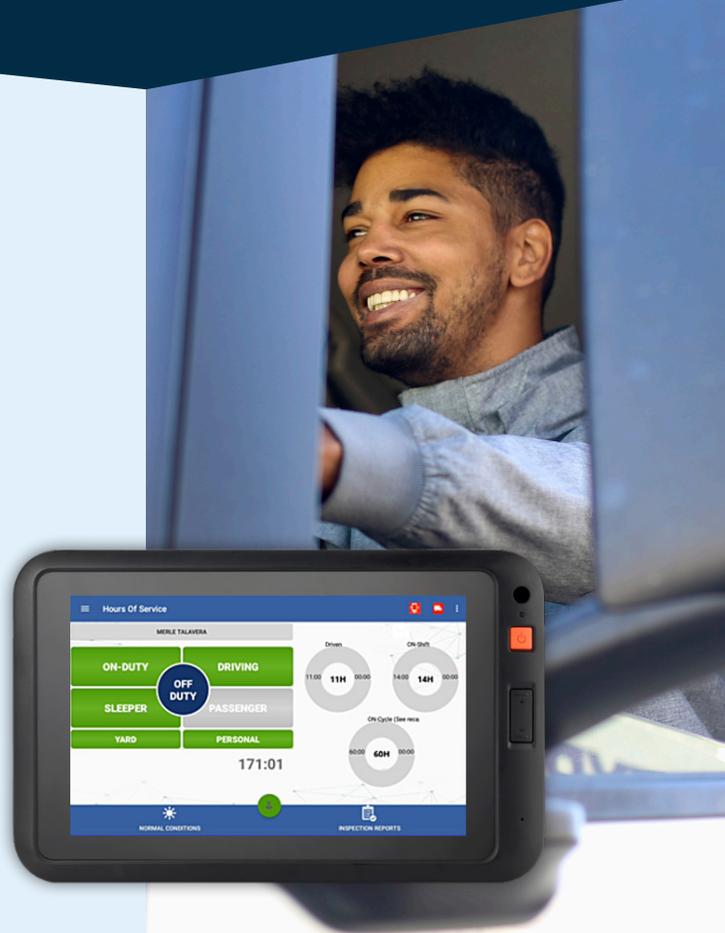

### CalAmp ELD

Carriers and drivers subject to ELD regulations are required to use registered and certified electronic logging devices for tracking, managing, and sharing records of duty service (RODS) data. Those not in compliance are subject to penalties including out-of-service placement, adverse impacts to CSA BASIC scores, and fines.

CalAmp ELD, powered by assured Techmatics, eases the burden of regulatory compliance with a driver-friendly solution adhering to US federal, intrastate, Canadian, and industry-specific regulations.

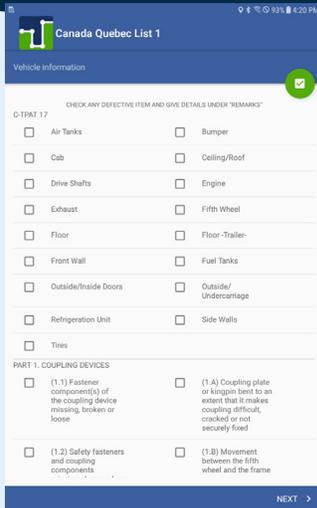

Paired with the proven [LMU-3640 gateway](#), the reliable system captures necessary speed, odometer, GPS, and driver input duty status for display, logging, export, and printed output. Intuitive system alerts help sidestep unidentified driving and other issues that can trigger potential violations.

Extensive reporting capabilities curate essential data regarding edited records, unassigned driving, personal conveyance, malfunctions, ECM disconnection, rejected edits, and more.

- ✓ Certified ELD compliance
- ✓ Intuitive, driver-friendly user experience
- ✓ Helpful alerts prompt action to avoid violations
- ✓ Choose a rugged 7" Android tablet from CalAmp or your own device
- ✓ 24/7 driver hotline available
- ✓ Spanish and French language support

# CalAmp Compliance | Avoid Regulatory Headaches and Streamline Reporting

## Electronic DVIR Reporting

Accelerate mandatory DVIR inspections and reporting with pre-populated checklists that guide drivers through the process. Customize your inspection form, add notes, take photos, attach DTC codes, and capture audit logs to improve clarity and maintain oversight. Opt for DVIR as a standalone solution or combine with ELD and IFTA capabilities. Deploy with a rugged 7" Android tablet from CalAmp or your own device (Android or iOS).

## Automated IFTA Reporting

Streamline compliance with simple, comprehensive IFTA fuel tax reporting. Easily import state miles and fuel purchases and quickly remedy missing or incorrect data. Avoid delays with one-click fleet, state, or vehicle reporting. Simplify administration via the easy-to-navigate portal.

## A Tablet Built for the Road

Choose your own device or go with this small form-factor, ruggedized 7" Android tablet, purpose-built for industrial use. The high-brightness 1024 x 600 capacitive multi-touch display features:

- Optical bonding
- Glove support
- Anti-glare coating
- IP54 and MIL-STD-810G ratings for dust, 4-foot drop, and water resistance
- Vibration and shock resistance
- Operates at extreme temperatures (-4° to +140°F), humidity (95%, non-condensing), and altitude (15,000 ft)

Software is pre-loaded at the factory for faster deployment. The cradle is hardwired directly to your CalAmp LMU-3640 gateway, avoiding connectivity disruptions.
