Indiana District Featured on CBS News for Adoption of Bus Tracking App

Avon, Indiana Community Schools

Few of us recall the struggle to navigate our world before GPS-enabled mobile technology not to mention incorporating it into a school bus system.. Yet CalAmp's successful mobile app, Here Comes The Bus, caught the attention of Avon (Indiana) Community School Corporation as well as producers from CBS News for that very reason.

The CBS News TV show "Innovation Nation" visited CalAmp's Indianapolis offices in 2019 and featured CalAmp highlighting how this simple and powerful school bus tracking app is massively improving the school bus experience for hundreds of school districts nationwide.

Parents appreciate that they no longer have to send their child out to the bus stop 10 or 15 minutes ahead of time, especially in the cold or rainy weather. There's no more guesswork—parents can simply log in, determine where the school bus is and when it will be at their stop, and send the kids out at the appropriate time.

To learn more, watch CBS' Innovation Nation (Season 6, Episode 4) that aired October 19, 2019. [Click here](#) and see how this Midwestern school district has used this technology to improve the way they serve their community.

Fleet Size: 138 buses

Studen Ridership: 9,800

Great app!

Feb 12

mecacmom

Great way to monitor my vehicles on the go? No longer chained to my desk.

Love it

Mar 15

AbsDoRight

I love it. I'm able to track my buses...

Pretty cool

May 2

Ebbarnes20

Love how I can watch the fleet and when they use the reds ambers and making a stop...

Convenient way to locate vehicles

May 16

tcpind79

This app is easy to use and gives me the information I need when not in front of my computer

About CalAmp

CalAmp (NASDAQ: CAMP) is a telematics pioneer leading transformation in a global connected economy. We help reinvent businesses and improve lives around the globe with technology solutions that streamline complex IoT deployments and bring intelligence to the edge. Our software applications, scalable cloud services, and intelligent devices collect and assess business-critical data from mobile assets, cargo, companies, cities and people. We call this The New How, powering autonomous IoT interaction, facilitating efficient decision making, optimizing resource utilization, and improving road safety. CalAmp is headquartered in Irvine, California and has been publicly traded since 1983. LoJack is a wholly owned subsidiary of CalAmp.
