SPECIALIZED DISCLOSURE REPORT

CalAmp Corp.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation
or organization)

0-12182

(Commission File
Number)

95-3647070

(I.R.S. Employer Identification No.)

**15635 Alton Parkway, Suite 250
Irvine, California**

(Address of Principal Executive Offices)

92618

(Zip Code)

Richard Vitelle

Executive Vice President and Chief Financial Officer

(949) 600-5600

(Name and telephone number, including area code, of the person to contact in connection with this report)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Section 1 - Conflict Minerals Disclosure

Items 1.01 and 1.02 Conflict Minerals Disclosure and Report; Exhibit.

Conflict Minerals Disclosure

CalAmp Corp.'s Conflict Minerals Report for the year ended December 31, 2015 is filed as Exhibit 1.01 hereto and is publicly available on the Company's web site at www.calamp.com/supply-chain.

Section 2 - Exhibits

Item 2.01. Exhibits.

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has caused this report to be signed on its behalf by the duly authorized undersigned.

CALAMP CORP.

By: /s/ Richard Vitelle

Richard Vitelle

Executive Vice President and Chief Financial Officer

Date: May 31, 2016

CalAmp Corp.
Conflict Minerals Report
For the Calendar Year Ended December 31, 2015

1. Introduction

This Conflict Minerals Report (“Report”) of CalAmp Corp. (“CalAmp,” the “Company,” “we,” “us,” or “our”) for the year ended December 31, 2015 is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934, as amended (the “Rule”). A number of terms used in this Report are defined in the Rule and Form SD, and to the extent that a term is not defined in this Report, the reader should review those sources for such definitions.

Pursuant to the Rule, we undertook due diligence measures on the source and chain of custody of the necessary conflict minerals (defined as “3TG” below) contained in our products that we had reason to believe may have originated in the Democratic Republic of the Congo (“DRC”) or the adjoining countries (collectively with the DRC, the “Covered Countries”), and may not have come from recycled or scrap sources, to determine whether such products were conflict free. We use the term “conflict free” in this Report to refer to suppliers, supply chains, smelters, and refiners whose source of conflict minerals did not, or do not, directly or indirectly finance or benefit armed groups in the Covered Countries. “Conflict minerals” consist of cassiterite, columbite-tantalite, wolframite, their derivatives tin, tantalum and tungsten, and gold (collectively, “3TG”).

CalAmp is a provider of wireless communications solutions for a broad array of applications to customers globally. Our business activities are organized into our Wireless DataCom and Satellite business segments. Our Wireless DataCom segment offers solutions to address the markets for Machine-to-Machine (“M2M”) communications, Mobile Resource Management (“MRM”) applications, and other emerging applications that require anytime and everywhere connectivity. The Company’s M2M and MRM solutions enable customers to optimize their operations by collecting, monitoring, and efficiently reporting business-critical data and desired intelligence from high-value remote and mobile assets. The MRM products include Location Messaging Units (“LMUs”) which are products utilizing cellular and GPS technologies to provide location and performance information from vehicles and other mobile assets back to centralized control centers. The M2M products include GPS devices and/or cellular modules that perform similar tasks to the MRM products, along with routers, gateways and base stations, to enable M2M capabilities. The Company’s satellite products include Low Noise Block (“LNB”) downconverters that are part of the outdoor customer premise equipment and devices for in-house distribution of video programming that are sold to Echostar Corporation, an affiliate of Dish Network, for incorporation into complete subscription satellite television systems. Our portfolio of wireless communications products includes asset tracking devices, targeted telematics platforms, fixed and mobile wireless gateways, and full-featured, multi-mode wireless routers. All of the products listed above contain electronic assemblies that include printed circuit boards, integrated circuits, and solder. The nature of these technologies requires the usage of 3TG materials for primary functionality. Thus, 3TG materials may be considered necessary to the functionality or production of our products as described above.

On March 18, 2016, we acquired LoJack Corporation (“LoJack”), which provides after-market safety, security, and protection products and services for tracking and recovering cars, trucks, and other valuable mobile assets. We have not included the products sold by LoJack in this Report because this acquisition occurred subsequent to the reporting period covered by this Report.

A substantial portion of our products, components and subassemblies are currently procured from foreign suppliers located primarily in Hong Kong, mainland China, Taiwan, other Pacific Rim countries and

Europe. We are a downstream company and do not purchase 3TG materials directly from mines, smelters, or refiners and, as such, we must rely on our suppliers to provide information on the origin of the 3TG materials contained in the components and materials that they supply to us, including sources of 3TG materials supplied to them from their upstream suppliers.

We have taken the steps described below to comply with the Rule.

2. Due Diligence

Our due diligence measures have been designed to conform, in all material respects, to the five-step framework in the Organisation for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, 3rd Edition (“OECD Guidance”) and the related supplements for 3TG.

a. OECD Guidance Step 1: Establish company management systems

- We have adopted and communicated our conflict minerals policy both publicly and to relevant internal and external parties.
- Our conflict mineral policy is available on our website at www.calamp.com/supply-chain. Our conflict minerals policy is not incorporated herein by reference.
- Our cross-functional conflict minerals team is composed of representatives from supply chain management, and the legal and finance departments to help ensure that policy statements and control processes are followed.
- We have an existing grievance mechanism for reporting policy violations via our hotline.
- We have incorporated conflict minerals compliance provisions in our supplier agreements.

b. OECD Guidance Step 2: Identify and assess risk in supply chains

Because of our size, the complexity of our products, and the depth, breadth, and ongoing evolution of our supply chain, it is difficult to identify suppliers upstream from our direct suppliers. Accordingly, we leverage the Conflict-Free Sourcing Initiative’s (“CFSI”) Conflict Minerals Reporting Template (the “CMRT”) to gather sourcing information on 3TG materials from our suppliers. We reviewed the supplier responses against criteria developed to determine which suppliers required further engagement and follow-up. These criteria included untimely or incomplete responses as well as inconsistencies within the data reported in the CMRT. For the 2015 reporting year, we surveyed our 341 direct suppliers using the CMRT. Of our 341 direct suppliers, we identified 6 suppliers of components and materials that contain 3TG materials.

c. OECD Guidance Step 3: Design and implement a strategy to respond to identified risks

- We report the results of our due diligence efforts on a periodic basis to senior management of the Company.
- As part of our risk mitigation process, for those suppliers who either do not have their own conflict minerals policy, provided incomplete or inaccurate information, or did not respond in a timely fashion or at all, we reviewed and considered: (i) whether or not to continue procurement; (ii) identifying alternative sources of supply; and/or (iii) disengagement.

d. OECD Guidance Step 4: Carry out independent third-party audit of supply chain due diligence

- As discussed above, we do not have direct relationships with smelters or refiners, and we do not perform direct audits of these entities' supply chains of conflict minerals. However, we rely on the CFSI's Conflict-Free Smelter Program ("CFSP") to oversee and coordinate third-party audits of these facilities.

- We also rely on the publicly-available audit results of the CFSP third-party audits to validate the sourcing practices of processing facilities in our supply chain.

e. OECD Guidance Step 5: Report on supply chain due diligence

We will file a Form SD and Conflict Minerals Report with the SEC on an annual basis, as required. Our Form SD and Conflict Minerals Report are also available on our website at the Investors tab at www.calamp.com.

3. Results of our due diligence

a. We received responses from 57% of our 341 suppliers surveyed. As a downstream company typically several layers removed from 3TG mining operations, smelters or refiners, we must rely on our suppliers to provide information regarding the source and presence of 3TG in our products. This information may be inaccurate or incomplete. Therefore, at this time, based on the due diligence described in this Report, we could not rule out the possibility that the 3TG materials in our products may have originated in the Covered Countries or may have not come from recycled or scrap sources.

b. Based upon responses to our CMRT, the smelters, refiners, and countries of origin identified through our due diligence process are listed in [Appendix A](#).

4. Risk Mitigation

We continue to refine and improve our processes in an effort to:

- a. Expand procurement processes for capturing 3TG information at the product level;
- b. Enhance data gathering and quality to further mitigate risk that any 3TG contained in our products benefit armed groups in the Covered Countries;
- c. Engage with our suppliers and direct them to resources in an attempt to increase the response rate and improve the content of the supplier survey responses;
- d. Engage any of our suppliers found to be supplying us with 3TG materials from sources that support conflict in the Covered Countries to establish an alternative source of 3TG materials that does not support such conflict; and
- e. Ensure our Conflict Minerals Policy is incorporated into relevant contracts.

Appendix A
List of Smelters, Refiners, and Countries of Origin Identified
