SPECIALIZED DISCLOSURE REPORT

CalAmp Corp.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation
or organization)

0-12182

(Commission File
Number)

95-3647070

(I.R.S. Employer Identification No.)

**15635 Alton Parkway, Suite 250
Irvine, California**

(Address of Principal Executive Offices)

92618

(Zip Code)

Kurtis Binder

Executive Vice President and Chief Financial Officer

(949) 600-5600

(Name and telephone number, including area code, of the person to contact in connection with this report)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2017.

Section 1 - Conflict Minerals Disclosure

Items 1.01 and 1.02 Conflict Minerals Disclosure and Report ; Exhibit .

Conflict Minerals Disclosure

CalAmp Corp.'s Conflict Minerals Report for the year ended December 31, 2017 is filed as Exhibit 1.01 hereto and is publicly available on the Company's web site at www.calamp.com/supply-chain.

Section 2 - Exhibits

Item 2.01. Exhibits.

[Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.](#)

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has caused this report to be signed on its behalf by the duly authorized undersigned.

CALAMP CORP.

By: /s/ Kurtis Binder
Kurtis Binder
Executive Vice President and Chief Financial Officer

Date: May 31 , 2018

CalAmp Corp.
Conflict Minerals Report
For the Calendar Year Ended December 31, 2017

1. Introduction

This Conflict Minerals Report (“Report”) of CalAmp Corp. (“CalAmp,” the “Company,” “we,” “us,” or “our”) for the year ended December 31, 2017 is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934, as amended (the “Rule”). A number of terms used in this Report are defined in the Rule and Form SD, and to the extent that a term is not defined in this Report, the reader should review those sources for such definitions.

The Rule requires us to conduct in good-faith a reasonable country of origin inquiry (“RCOI”). Pursuant to the Rule, we undertook due diligence measures on the source and chain of custody of the necessary conflict minerals (defined as “3TG” below) contained in our products that we had reason to believe may have originated in the Democratic Republic of the Congo (“DRC”) or the adjoining countries (collectively with the DRC, the “Covered Countries”), and may not have come from recycled or scrap sources, to determine whether such products were conflict free. We use the term “conflict free” in this Report to refer to suppliers, supply chains, smelters, and refiners whose source of conflict minerals did not, or do not, directly or indirectly finance or benefit armed groups in the Covered Countries. “Conflict minerals” consist of cassiterite, columbite-tantalite, wolframite, or their derivatives such as tin, tantalum and tungsten, and gold (collectively, “3TG”).

CalAmp is a telematics pioneer leading transformation in a global connected economy. We help reinvent businesses and improve lives around the globe with technology solutions that streamline complex Internet of Things (“IoT”) deployments through wireless connectivity solutions and derived data intelligence. Our software applications, scalable cloud services, and intelligent devices collect and assess business-critical data anywhere in the world from industrial machines, commercial and passenger vehicles, their passengers and contents. We call this The New How, powering data analysis interaction, facilitating efficient decision making, optimizing resource utilization, and improving road safety. Historically, our business activities were organized into two reportable segments – Wireless DataCom and Satellite. Effective August 31, 2016, we ceased operations of the Satellite business and through the first quarter of fiscal 2018, we operated under one reportable segment: Wireless DataCom. In the quarter ended August 31, 2017, in order to streamline our operations, global sales organization, and product line development resources, we realigned our operations and we now operate under two reportable segments: Telematics Systems and Software & Subscription Services.

Our connected telematics products combine innovative technology with adaptable and customizable functionality and industry-leading reliability. Our telematics product portfolio includes a series of Mobile Resource Management (“MRM”) telematics devices for the broader IoT market, which enable customers to optimize their operations by collecting, monitoring and effectively reporting business-critical information and desired intelligence from high-value remote and mobile assets. These wireless networking devices include asset tracking units, mobile

telematics devices, fixed and mobile wireless gateways and routers, which underpin a wide range of our own and third party software applications and solutions for business-critical applications demanding secure and reliable communications and controls anywhere in the world . The MRM telematics devices listed above contain electronic assemblies that include printed circuit boards, integrated circuits, and solder. The nature of these technologies requires the usage of 3TG materials for primary functionality. Thus, 3TG materials may be considered necessary to the functionality or production of our products as described above.

We are a downstream company and do not purchase 3TG materials directly from mines, smelters, or refiners and, as such, we must rely on our suppliers to provide information on the origin of the 3TG materials contained in the components and materials that they supply to us, including sources of 3TG materials supplied to them from their upstream suppliers.

We have taken the steps described below to comply with the Rule.

2. Due Diligence

Our due diligence measures have been designed to conform, in all material respects, to the five-step framework in the Organisation for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, 3rd Edition (“OECD Guidance”) and the related supplements for 3TG. The Securities and Exchange Act Commission (“SEC”) has recognized the OECD Guidance as an appropriate nationally and internationally recognized due diligence framework for conflict mineral reporting purposes. The design of our due diligence measures encompasses (a) establishing strong company management systems, (b) identifying and assessing risks in our supply chain, (c) designing and implementing a response to identified risks, (d) carrying out independent third-party audits of smelter or refiner due diligence practices, and (e) publicly reporting on our supply chain due diligence.

a. OECD Guidance Step 1: Establish strong company management systems.

We have adopted and communicated our conflict minerals policy both publicly and to relevant internal and external parties.

(1) Our conflict minerals policy is available on our website at www.calamp.com/supply-chain. Our conflict minerals policy and other information contained on our website is not incorporated by reference in, or considered to be a part of, this Report, the Form SD accompanying this Report or any other SEC filings made by us.

(2) Our cross-functional conflict minerals team is composed of representatives from supply chain management, as well as the legal and finance departments to help ensure that policy statements and control processes are followed .

(3) We have an existing grievance mechanism for reporting policy violations via our hotline.

We have incorporated conflict minerals compliance provisions in our supplier agreements

b. OECD Guidance Step 2: Identify and assess risk in supply chain.

As part of our RCOI, we leverage the Responsible Minerals Initiative's ("RMI") Conflict Minerals Reporting Template (the "CMRT") to gather sourcing information on 3TG materials from our suppliers. The CMRT was developed to facilitate disclosure and communication of information regarding smelters that provide materials to a company's supply chain. It includes questions regarding a supplier's conflict minerals policy, its due diligence processes, and the names and locations of smelters and refiners linked to its products. To collect this information for the 2017 reporting period, we partnered with a third-party service provider, Claigan Environmental Inc. ("Claigan"). We reviewed the supplier responses against criteria developed to determine which suppliers required further engagement and follow-up. These criteria included untimely or incomplete responses as well as inconsistencies within the data reported in the CMRT. For the 2017 reporting year, we surveyed our 620 direct suppliers using the CMRT. Of our 620 direct suppliers, we identified 324 suppliers of components and materials that contain 3TG materials.

CalAmp's smelter RCOI and Due Diligence Process included the following:

(1) For each smelter identified in CalAmp's supply chain CalAmp attempted direct engagement with the smelter to determine whether or not the smelter sources from the DRC or adjoining countries.

(2) For smelters that declared directly (e.g. email correspondence, publicly available conflict minerals policy, or information available on their website) or through their relevant industry association that they did not source from the DRC or adjoining countries, and were not conformant to the RMI's Responsible Minerals Assurance Process ("RMAP"), CalAmp reviewed publicly available information to determine if there was any contrary evidence to the smelter's declaration. The sources reviewed included:

(a) Public internet search (Google) of the facility in combination with each of the Covered

Countries;

(b) Review of these specific NGO publications:

- (i) Enough Project
- (ii) Global Witness
- (iii) Southern Africa Resource Watch
- (iv) Radio Okapi;

(c) The most recent UN Group of Experts report on the DRC.

(3) For smelters that did not respond to direct engagement, CalAmp reviewed publicly available sources to determine if there was any reason to believe that the smelter may have sourced from the Covered Countries during the reporting period. CalAmp reviewed the same sources as those used to compare against smelter sourcing declarations.

CalAmp's suppliers identified 319 smelters. CalAmp identified 42 smelters that source, or there is a reason to believe they may source, from the Covered Countries. CalAmp determined that 37 of these 42 smelters have been audited and are conformant with the RMAP. CalAmp conducted risk mitigation on the remaining 5 smelters.

c. OECD Guidance Step 3: Design and implement a strategy to respond to identified risks.

(1) We report the results of our due diligence efforts on a periodic basis to senior management of the Company.

(2) As part of our risk mitigation process, for those suppliers that provided incomplete or inaccurate information, or did not respond in a timely fashion or at all, we reviewed and considered: (a) whether or not to continue procurement; (b) identifying alternative sources of supply; and/or (c) disengagement.

(3) For high risk smelters (smelters that are sourcing from or there is reason to believe they may be sourcing from the Covered Countries and are not conformant with the RMAP), CalAmp communicates the risk to a designated member of senior management (OECD Step 3A) and conducts risk mitigation on the smelter in accordance with OECD Step 3B.

(4) CalAmp conducted risk mitigation on 5 smelters that were not conformant with the RMAP. CalAmp's risk mitigation process included the following:

(a) Additional due diligence to determine if there was any reason to believe the smelter directly or indirectly finance or benefit armed groups in the DRC or adjoining countries.

(b) Verifying with internal stakeholders and relevant suppliers whether 3TGs from the specific smelter were actually in CalAmp's supply chain in the 2017 reporting period.

(c) Direct engagement with the high risk smelter to verify risk and to encourage the smelter to become conflict free.

At this time, based on the due diligence described in this Report, we could not rule out the possibility that the 3TG materials in our products may have originated in the Covered Countries or may have not come from recycled or scrap sources.

d. OECD Guidance Step 4: Carry out independent third-party audit of supply chain due diligence.

As discussed above, we do not have direct relationships with smelters or refiners, and we do not perform direct audits of these entities' supply chains of conflict minerals. We instead rely on RMAP to validate the sourcing practices of processing facilities in our supply chain. The RMI oversees and coordinates third-party audits of these facilities. However, we have not reviewed the reports of such third parties directly. Instead, we relied on the results summarized by RMI.

e. OECD Guidance Step 5: Report on supply chain due diligence.

We will file a Form SD and Conflict Minerals Report with the SEC on an annual basis, as required. Our Form SD and Conflict Minerals Report are also available on our website at the Investors tab at www.calamp.com.

3. Improvement Plan

We continue to refine and improve our processes in an effort to:

a. Expand procurement processes for capturing 3TG information at the product level;

b. Enhance data gathering and quality to further mitigate risk that any 3TG contained in our products benefit armed groups in the Covered Countries;

c. Engage with our suppliers and direct them to resources in an attempt to increase the response rate and improve the content of the supplier survey responses ;

d. Engage any of our suppliers found to be supplying us with 3TG materials from sources that support conflict in the Covered Countries to establish an alternative source of 3TG materials that does not support such conflict; and

e. Ensure our Conflict Minerals Policy is incorporated into relevant contracts.

Appendix A
List of Smelters and Refiners Identified by CalAmp Suppliers
